To Whom It May Concern:

I am very proud to say I have been a patient of Dr. Robert Battle since September 2003. My physician in California recommended him to me before I moving to Houston. I am so thrilled to have Dr. Battle as my general practitioner. He has helped me to maintain my health with a high energy level. I plan to continue to see him for all my medical needs. He is very thorough without using invasive procedures, which I greatly appreciate. I believe he has helped me to stay off prescription medicines with unpleasant side effects that must be taken the rest of my life by getting to the root of the problem. He does not treat symptoms, he finds out why you feel the way you do and corrects the imbalance.

Although both my parents were registered nurses, they chose to seek doctors that practiced holistically for themselves and I followed their lead. I just can't say enough about the professional care I receive from Dr. Battle. I have many friends my age that are suffering from many of the same complaints I once had, however, they are not doing well at all. One friend is collecting disability and can no longer work, as she is in so much pain she is not able to get out of bed on most days. Another friend has passed away. She went through many tests and surgeries without any improvement. She only got worse. Whenever I talk with my friends, and they say how bad they are feeling, or say they are hoping that the treatment they are on will bring better results, I thank God that I have Dr. Battle to help me manage my healthcare. I wish more doctors practiced medicine the way Dr. Battle does.

Sincerely,

Margaret M. Kacinskas
