Dr. Battle,

I just wanted to thank you for giving me my freedom back! I cannot express the difference it has made in, not only my life, but the life of my husband and children.

When I was diagnosed with ulcerative colitis, the doctor told my husband, while I was still sedated, that I would be on medication the rest of my life. Well, I guess you proved them wrong!

I dealt with the symptoms for three years before I sought treatment from your office, and the change was so slow I didn't realize how miserable I was or, how miserable I was making my family.

Then when you called me back before I had my first appointment, and actually spent the time to find out about my family history, and my health history I was amazed. Even before my first appointment when you suggested avoiding dairy products, I started to notice a difference within days.

I now feel better than I have felt in years. I have more energy, I am a better wife and mother, and I can't thank you enough. You have given me my life back and I am enjoying every moment!

Sincerely,

Cheryl Miksch
