

June 13, 2016

When I found Dr. Battle I was slowly dying. I had seen numerous doctors and spent thousands of dollars and I had not experienced any improvement. I had no energy, stamina or endurance. Walking from my sofa to the kitchen, less than 5 feet, was overwhelmingly exhausting. My breathing was so labored speaking was a chore. I noticed numerous changes in my body. I walked as if I was 100 years old. Washing the countertops, something we all take for granted, absorbed all my energy. I was a young 50-year-old. I was scared.

Linda who sits at the front desk and interacts with all the patients is a supportive, compassionate and encouraging advocate for all patients. Linda was genuinely concerned when I called the office. Her kindness, understanding, and patience encouraged me to make the decision to see Dr. Battle. I wanted a positive environment and Linda oozed compassion. As Dr. Battle's employee Linda was also a patient and could understand my fear. She is very loving. Honestly, I don't know what I would have done without her being there.

On my first visit I had many tests performed. When my tests were completed I sat in Dr. Battle's office and we reviewed my results. He listened to me and answered all my questions. For this I was so grateful! He has a confidence that is reassuring, calming, and encouraging. I clearly remember when we walked into the exam room and I sat on the table. I was shaking in worry and concern. Dr. Battle noticed this and he quietly asked me about my faith in God. Then he pointed his finger upward and humbly said it is God working through me that you will heal and I am His faithful assistant. Tears rolled down my face; I knew in that moment I was in great hands! Dr. Battle is not a doctor who thinks he is God. I knew, in time, with Dr. Battle I would be healed. Dr. Battle is just as committed as I am to being healed. Many times Dr. Battle reassuringly held my hand. His kindness put me at ease.

I was diagnosed with Lyme Disease. This bacterium was in my system for perhaps 10 to 15 years. I was told by other doctors it was my thyroid.

Words cannot convey my gratitude and thanks for Dr. Battle. I have my life back! I confidently recommend him and his team!

**See Doctor Battle first! And follow ALL his instructions.**
